Standard Leaf Collector

The Standard Leaf Collector aspirator consists of a simple and efficient suction system.

It has a powerful 2 HP motor for sucking up leaves and a sound level of only 81 dB.

Quick and easy installation

Its lightweight and compact design enable simple and fast installation: fit the suction system in just 5 minutes, then simply connect the hose to your trimmer and press the power button.

The Standard Leaf Collector is compatible with trimmers: MT Tumbler 500 and MT Tumbler 500 MED.

High mobility

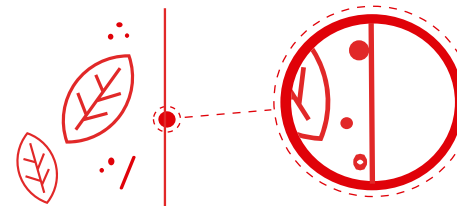

The four built-in polyethylene wheels enable you to move your aspiration system where you need it most.

Operation

The aspiration system sucks the leaves from the trimmer and conveys them through the suction tube to be deposited in the leaf collection bag.

The leaf collection bag consists of a bag made of polyethylene, a type of thermoplastic polymer, which prevents any type of material (flowers, resin) from escaping its walls.

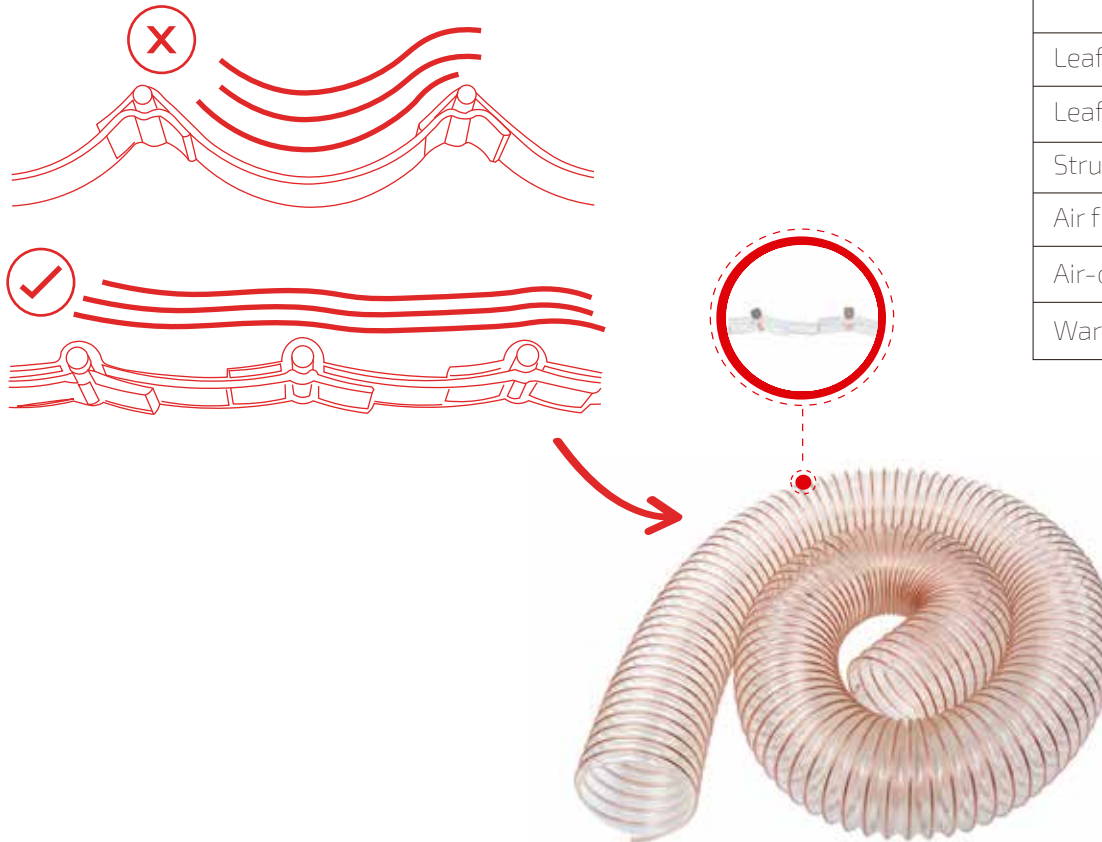

- 1 Air filter bag. PET (Polyethylene terephthalate)
- 2 2 HP air-cooled motor.
- 3 Lacquered iron structure. Strong and easy to transport
- 4 Leaf collection bag. PE (Polyethylene)

Suction system

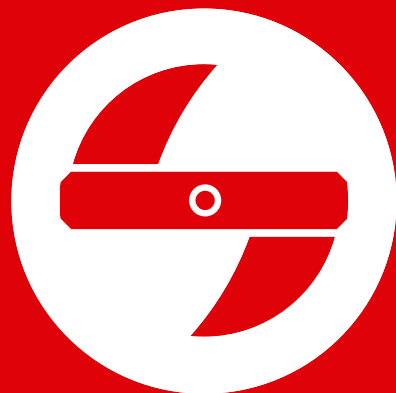

The suction system of the Standard Leaf Collector consists of a 40-micron filter for high air flow, the collection bag, powerful 2 HP motor and the food certified suction tube.

The suction tube is designed for maximum absorption performance. The polyurethane suction hose has a low curvature between its steel ribs, thus increasing suction power and preventing pressurized air from being lost in the rounding space.

Technical information

Electrical connection	230 V 50/60 Hz single phase
Suction system weight	47 kg
Suction system size	98 x 54 x 130 cm
Box dimensions	105 x 61 x 52 cm
Air suction rate	3000 CFM
Sound level	81 dB
Suction tube	Food certified
Suction tube	Polyurethane, PU plastic, spiral steel wire
Leaf collection bag capacity	150 litres
Leaf collection bag	Polyethylene
Structure	Lacquered iron
Air filter bag	Polyethylene terephthalate
Air-cooled motor	Yes
Warranty	1 year
